

*Now Available to Land O'Lakes Members*  
**Exclusive Paul Mueller Company**  
**HiPerForm® *plus* Control Offer**

Take advantage of special HiPerForm® *plus* control pricing for Land O'Lakes Members. There are two ways to benefit. Upgrade your on-farm milk storage with a Mueller® Milk Tower™ or a milk cooler, and a HiPerForm *plus* control. Or, opt to add the HiPerForm *plus* control, with level sensing, to your existing on-farm storage (the HiPerForm *plus* can be added to any brand). Special pricing begins July 1, 2021.

**For Land O'Lakes Members who are upgrading their on-farm storage to new towers or tanks:**

- The Member will negotiate the purchase of the tank or tower with their Mueller® authorized dealer for any size tank or tower, which will include the normal pricing for the HiPerForm III control.
- The buyer must identify themselves as a Land O'Lakes Member at the time of purchase with the dealer.
- Once identified, the dealer will provide an automatic upgrade to the HiPerForm *plus* control. This includes the wall or tank mount, individual jar dispenser for chemicals, or auto dosing.
- This is a \$3,500 to \$4,000 value to the Member.

**For Land O'Lakes Members who are interested in purchasing the controller only:**

- The Member will purchase the HiPerForm *plus* control through their dealer.
- The Member must then register through the MilkSecure™ site (where all the controller data is housed).
- When registering, the Member will provide their Land O'Lakes Farm ID. When a Member account initiates using the Farm ID on the MilkSecure site, they will be issued a digital \$250 Mueller product card/credit certificate that can be used with the dealer on Mueller capital goods or other products, at the discretion of the dealer.

## *Upgrade Your Milk Cooling Experience* **Mueller® Model “OHF” Milk Cooler**

Designed for use in both traditional and robotic dairy farm operations, this wash and cooling control retrofits any bulk milk tank with program options, and the MilkSecure™ technology built inside provides the ultimate solution for remote monitoring.

A cloud-based interface reports the status of milk cooling systems to dairy producers, including milk volume, milk temperatures, equipment alerts, and more. Real-time updates through your smartphone let you keep an eye on your farm when you need to be away. Connect your dairy, dealer, hauler, processor, and team. Safeguard your milk. When dairy life is unpredictable, Paul Mueller Company delivers.

### **HiPerForm *plus* Control Highlights**

- Automatic interval agitation
- Electronic time-and-temperature recorder
- Real-time tank temperature and volume data
- A built-in troubleshooting test program
- Selectable drain valve types
- Digital 7-inch touch screen interface
- Cooling and wash time delay
- Dry switch closure or 24-VAC output voltage
- Built-in robotic interface
- Volume indicator
